## PORTABLE REFRIGERATION GAS RECOVERY STATION + FILTRATION KIT

---

### PURPOSE

The purpose of this device is to recover refrigerant gases on site or in a maintenance area, thanks to its characteristic of being portable.

### PARTICULARITY

Mounted in a compact and robust plastic box, anti-shock and anti-corrosion, which allows the recovery of all types of refrigerant gases, with a filtration kit included.

Reference 4646900000

### FEATURES

- 3 functions: opening – closing / input – output / purge – recovery
- Oil-free compressor, maintenance-free operation
- PURGE function, emptying residual refrigerant from the unit (self-cleaning mode)
- High and low pressure gauges
- Detachable cable
- 1/4 thread connection

### TECHNICAL DETAILS

- Voltage: 220-240V. 50-60Hz. 110-120V. 60Hz.
- Power: 3/4HP
- Motor speed: 1450rpm at 50Hz. 1760rpm at 60Hz.
- Pressure switch: 38.5Bar / 3850KPa (558psi)
- Recovery rate: 96 l/hour
- Weight: 13.5Kg
- Dimensions : 400mm x 250mm x 360mm
